

eFuse / Hot-Swap Selection Worksheet

Use this worksheet to capture requirements before part selection.

Inputs: VIN range, I_nom/I_peak, C_load, inrush budget, ambient/max Tj, target dV/dt, fault policy (timer / latch-off / auto-retry), ORing/backfeed strategy, telemetry needs.

Table (copy to spreadsheet if needed): Rail | VIN | I_nom | I_peak | C_load | dV/dt | I_limit mode | Timer/Retry | OVP/UVP | Reverse | PG/EN | Notes.
